

# Robot Philosophy AI Scoping

Strategic Consultancy in Artificial Intelligence

Evaluating industry-specific Artificial Intelligence trends, strategising automation projects, and advising on best implementation practices.

Improved efficiency, smarter decisions, and competitive edge with AI trusted by many of the world's leading brands:

**Ideal for:**

Healthcare • Industry • Transportation  
Electronics • Finance • Retail • Energy

### Identify and Describe Potential AI Projects:

- Pinpoint various AI projects relevant to the industry or business.
- Provide detailed descriptions of each project, including their objectives and how they are expected to function.

### Assess Impact on Productivity and Work Environment:

- Assess AI projects for productivity and quality enhancement.
- Examine their impact on improving the work environment.
- Identify projects with immediate benefits and future scalability and sustainability.

### Estimate Savings and Efficiency Gains:

- Calculate the expected reduction in operator hours due to the implementation of AI.
- Assess the quality improvements that can be achieved with AI automation.
- Evaluate the efficiency in the use of materials when AI are employed.

### Calculate Return on Investment (ROI):

- Determine the ROI for each AI solution.
- Include factors like cost savings, increased production, and quality improvements.

### Evaluate Value and Risk:

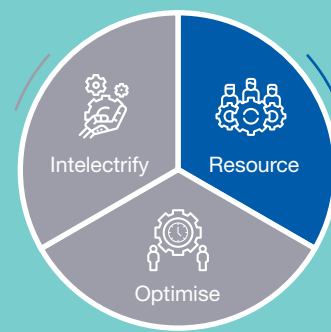

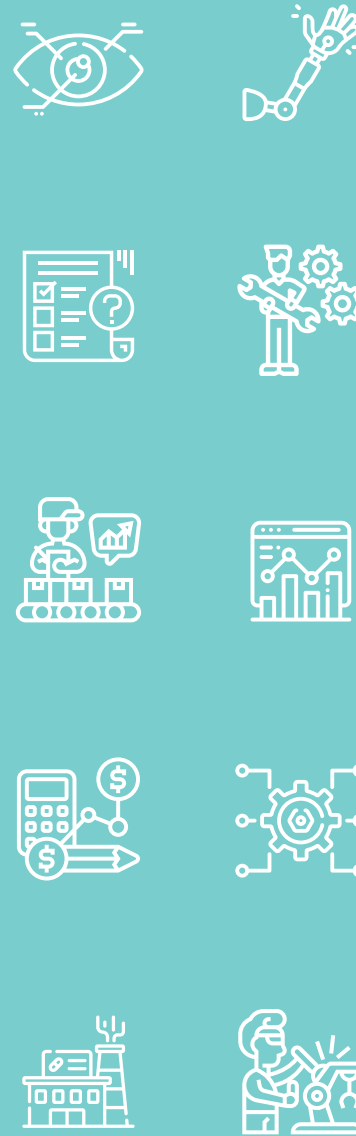

- Estimate the value that each AI project is expected to bring to the organisation.
- Assess project risks and potential challenges.

### Develop a Roadmap for Implementation:

- Create a comprehensive implementation plan.
- Highlight 'quick wins' for early implementation and visibility.
- Plan longer-term project timelines, factoring in dependencies and resources.

The price AI scoping with AI expert is **£9,850 + VAT**
